# TRYHACKME OPENVPN

Objective: To configure and establish a VPN connection to access TryHackMe's virtual network.

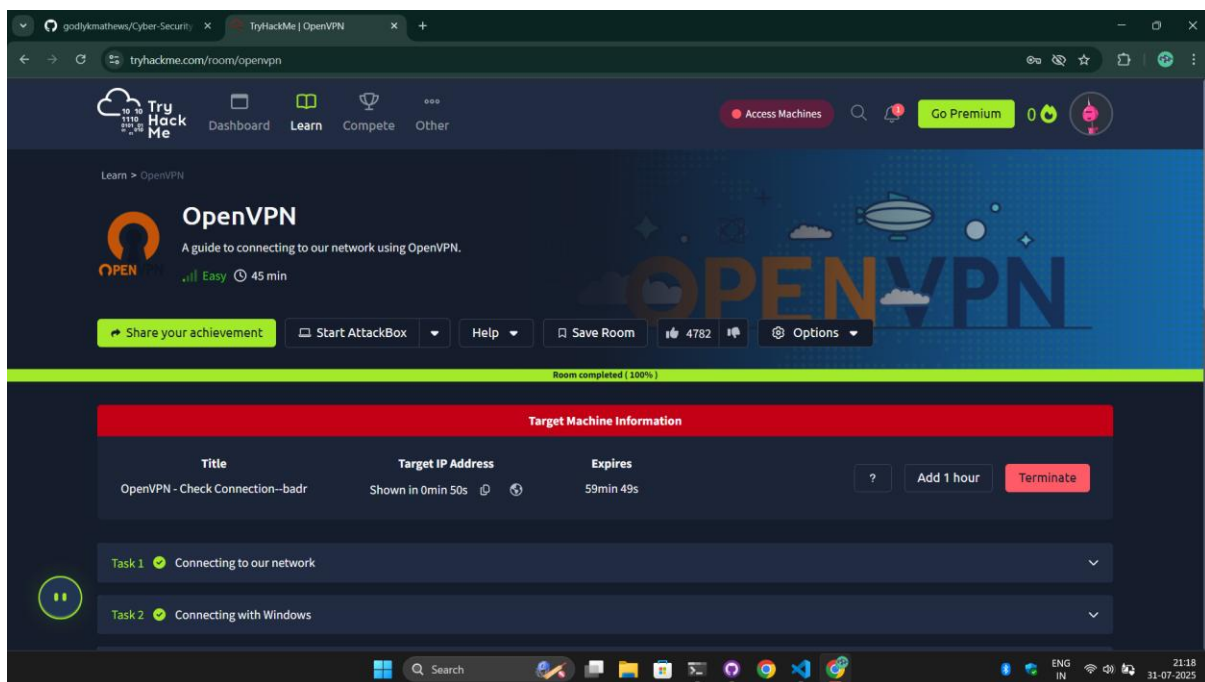

What I Did

- Downloaded the **OpenVPN client** for Windows from the official website.

- Retrieved my **TryHackMe VPN configuration file** (godlykmathews.ovpn) from the website.

- Placed the godlykmathews.ovpn file in the OpenVPN\config directory.

- Launched the **OpenVPN GUI** as administrator.

- Right-clicked the system tray icon and selected **"Connect"**

- Verified the connection and ensured the **tun adapter** was assigned an IP.

What I Learned

- How to use **OpenVPN GUI** on Windows to connect to secure networks.

- The **VPN tunnels** in accessing TryHackMe's virtual machines.
