

# Task 2 - Google Dorking

## Topic: Finding Publicly Accessible Documents from lenskart.com

Submitted by: Geo George

Google Dorking is an OSINT (Open-Source Intelligence) technique used to locate data that is publicly available on the internet but may not be easily discoverable through regular browsing. By using advanced Google search operators, it is possible to find files, directories, and pages indexed by Google. In this task, the target domain is lenskart.com, and the goal is to identify a publicly available PDF document.

### Google Dork Query Used:

site:lenskart.com filetype:pdf

### Explanation of the Query:

- *site:lenskart.com* - restricts search results to Lenskart's official domain.
- *filetype:pdf* - filters results to only PDF files indexed by Google.

### Result Found:

- Document Name: Eye Chart Alphabet
- Direct Link:  
[https://static.lenskart.com/images/cust\\_mailer/29-JULY-EYE-TEST/Eye-Chart-Alphabet.pdf](https://static.lenskart.com/images/cust_mailer/29-JULY-EYE-TEST/Eye-Chart-Alphabet.pdf)

### Document Analysis:

- **Content:** The PDF is an eye test chart featuring Sloan letters arranged in various sizes, measured in LogMAR values and equivalent visual acuity distances (in meters and feet). It includes calibration details for use at distances such as 3 meters and 10 feet. The chart contains letters like 'L', 'E', 'N', 'S', 'K', 'A', 'R', 'T' displayed in decreasing size to evaluate vision sharpness.
- **Purpose:** This document is designed for visual acuity testing, helping optometrists and customers check eyesight. It may also serve as a promotional or engagement resource for Lenskart's customers.
- **Public Availability Reason:** Officially shared on Lenskart's website for public use, allowing anyone to download and print the chart for home-based preliminary eye tests.

### Summary:

This exercise demonstrates the use of Google Dorking to locate publicly available documents from a specific domain. Using the query *site:lenskart.com filetype:pdf*, we successfully identified the 'Eye Chart Alphabet' PDF from Lenskart.com. The file contains a standardized vision test chart and is intentionally made available by Lenskart for its customers, highlighting how OSINT techniques can uncover useful resources without breaching ethical or legal boundaries.
